Amenities refurbishment
Springfield, Queensland
Services delivered: construction

Business value created for the client

The St Augustine Catholic College community were delivered a new amenities facility during the school holidays; ensuring the school programme, especially during the busy return-to-school period, was seamlessly maintained. Wiley applied experienced project and site management processes, to meet the client's target of being delivered through school holidays and completed by the commencement of the new school calendar year. Committed to meeting the client's schedule, the Wiley team worked through the Christmas holidays, fast-tracking the program so that the site was only closed on 25 and 26 December.

The challenging scope Wiley delivered

Wiley delivered the refurbishment of the amenities prep and senior blocks, and applied experience in working within a live, educational environment, ensuring the safety of all people on site. The project included:

- Demolition works—existing walls, floors tiles, showers, fixtures and fittings
- Installation and general works
  - Bedding and waterproofing, new vinyl floors, tiled walls, laminate toilet partitions, bench seats
  - All new female and male showers, toilets, urinals and privacy screens
  - Glazing/mirrors, skylights, LED lighting and exhaust fans
  - New security doors
  - Paint internal/external and painting existing screens at toilet block 20 and 21
  - New water isolation valves to block 21
- Repair works including child care roof repairs and repairs from white ant damage, including wall removal and making good.

"The completed project looks so much better than what we were expecting. We're absolutely thrilled with Wiley's work."

Donna Madsen, Business Manager, St Augustine's College
