

Goodna Special School

Multi-level learning facility and hospitality kitchen

Goodna Special School provides essential educational services for students from Prep to Year 12. This new General Learning Centre enhances the school's facilities and supports its mission to provide quality education to an expanding student body.

GLA & KITCHEN (STAGE 1)

-  Goodna, Queensland
-  \$9.9M
-  Feb 2020 – Jan 2021
-  Design and construction

GLC & ADMIN (STAGE 2)

-  Goodna, Queensland
-  \$17.2M
-  Feb 2021 – Apr 2022
-  Construction

Project scope

Wiley successfully delivered eight new General Learning Areas (GLAs), a commercial-grade hospitality kitchen, a gym, therapy rooms, sensory learning spaces, and student amenities at Goodna Special School.

The project also features inspiring outdoor learning environments and an architecturally designed garden terrace for students to grow their own produce, for use in the new kitchen.

With safety as the highest priority, Wiley applied its expertise in managing live educational environments, ensuring the safe installation of full-height precast concrete panels throughout the project.

Business value to client

Wiley delivered a cutting-edge, three-level learning centre for Goodna State Special School, carefully designed to meet the expanding needs of its growing community. The new facility fosters a dynamic learning environment with innovative spaces that encourage connectivity among students, helping to build a strong sense of community. The design also supports the evolving educational requirements of the students, offering versatile spaces that adapt to a variety of learning styles.

From the project's outset, Wiley prioritised proactive stakeholder engagement, ensuring that the school's practical needs were at the forefront of every decision. We worked closely with the school community to identify key objectives, ensuring these were met while maintaining an open dialogue throughout the construction process. Our collaborative approach allowed us to explore potential cost-saving solutions without compromising the quality of the finished product.

This ongoing collaboration with the school allowed us to align the project with its mission and vision, creating a facility that supports both current and future educational requirements. By balancing cost considerations with a focus on quality, Wiley delivered a state-of-the-art learning centre that provides students and teachers with a space designed for long-term success. The completed facility ensures the school is well-positioned to support its community for years to come.

To whom it may concern,

I am writing this reference at the request of WILEY - THE PROJECT DELIVERY COMPANY, who are currently constructing a new multistory Teaching and Learning Centre on site here at Goodna Special School.

The staff at Wiley have a number of strengths I'd like to share. They obviously have exceptional technical skills and experience in the construction industry. Their organizational and communication skills are extremely good. For example, over the last 2 years of planning for our build they encouraged our leadership team to be part of the design and construction process and valued our input. As a result of this close collaboration the school will receive a new Learning Centre specifically designed to meet our student's needs into the future.

Wiley also take great pride in working with us to provide the highest level safety and security possible on our school site and their construction site. They have worked extensively with the local community to ensure their needs and their properties are well cared for at all times during the construction process.

In conclusion, I would highly recommend WILEY - THE PROJECT DELIVERY COMPANY for any future constructions and confirm that they would be an extremely positive addition to any organization as they go through their own future planning ventures. If you need any additional information, feel free to contact me at Goodna Special School Ph 33814222 or by email at kkitch13@eq.edu.au anytime.

Sincerely,

Mark Kitching
Deputy Principal
Goodna Special School
