

Saint Stephen's College

New music centre

Saint Stephen's College is a co-educational, preparatory to Year 12 independent school at the Gold Coast in Queensland, Australia. Centred on Christian principles, it strives to develop self-directed, determined, courageous and skilful young men and women of substance.

-  Gold Coast, Queensland
-  \$6.4M
-  November 17 - October 18
-  Construction

Project scope

Two level, acoustically rated facility boasts 1,600m² gross floor area, and is fitted with high-end audio-visual equipment.

The ground floor contains instrument studio rooms and a (200+) tiered seating area for the main performance stage.

The first floor contains general learning areas and a music practice hall.

Business value to client

Wiley's substantial experience in the education sector, including private and public schools, TAFEs and universities, was vital to the success of this project.

Music programs at Saint Stephen's College offer students a blend of academic curriculum and co-curricular opportunities, including participating at a more challenging level in the Symphony Orchestra, string ensembles, stage and concert bands, vocal ensembles and their Chamber Music Excellence Program.

This new music centre adds value to Saint Stephen's College by providing a modern, human-centred facility that will enable its music program to grow from strength to strength, enticing enthusiastic, budding musicians to join its school community.

Partners and consultants

Supporting the local community is a core value that Saint Stephen's and Wiley share. Therefore, local subcontractors and suppliers were used wherever possible.

Project reference

Bob Nicol, Assistant to the Headmaster Administration and Compliance

“ Throughout the contract, and after, the commitment of all [Wiley] team members to the value of the organisation, to provide a quality professional service, were always evident. This approach ensured the innovative design in a challenging site was realised to achieve an outstanding resource for the College.
